## V. Key Operational Reminders

### Advertising Strategy

- Beach theme PPC is only \$0.20 — currently the lowest advertising cost entry point in the wall art category. Recommend allocating the majority of your initial budget here.
- Patriotic-related keywords will see bid increases after mid-June. Recommend launching ads 2 weeks early to lock in lower bid periods.
- Father's Day holiday keywords are more competitive. Recommend using long-tail keywords (e.g., "custom dad photo canvas") to lower CPC.

### Listing Optimization

- Size labeling must be clear — "size" is mentioned extremely frequently in reviews; consumers are often disappointed by unexpected sizes.
- Main Image Recommendation: Include actual size references (e.g., comparisons with sofas, beds, door frames) to reduce return rates.
- A+ Content: 80% of top sellers have configured A+ content. Recommend setting up 图文 content at launch.

## Packaging Experience

- Canvas is easily damaged during shipping — multiple ASIN reviews mention packaging/logistics issues.
- Enhanced packaging protection = significantly improved review rates (especially for custom photo products, where consumer expectations are high).
- For photo prints — emphasize "color calibration" and "crease-resistant packaging" to enhance professionalism.

## Repurchase Strategy

- Photo customization products have extremely high repurchase rates — "will order more" appears very frequently in reviews.
- Recommendation: Set up variations (sizes, materials) at launch to guide consumers to purchase multiple pieces for gallery walls.
- Set of 3 / Gallery Wall combination sets have significantly higher average order values and profit margins than single pieces.
